

Notice of Temporary Water Shut Down

We regret to inform you that it will be necessary to temporarily shut off water supply periodically between Tuesday, June 7, 2016 and Thursday, June 9, 2016. The affected area that will be shut down is on Roslyn Road, between Westbury Avenue and Plymouth Avenue and Colonial Avenue, between Astor Place and Roslyn Road.

The temporary water supply shut down is necessary so that PSEG Long Island's qualified water contractor can relocate portions of two of the Village's 6 inch water mains in order for PSEG Long Island to affect its electrical repairs. The Village of Mineola is assisting us by having Water Department personnel and their water engineers on location each day to provide supervision, work inspection and quality control for all work related to the Village's water main relocations.

On each of these days, it is anticipated that water supply will be shut down between the hours of 8 a.m. and 6 p.m. Each day, every effort shall be made to reduce the time period when water supply is not available to residents. We recommend that water be stored in portable containers for use during this time period. Water supply shall be returned to the affected residents as soon as possible each night.

We further recommend that each night when the water supply is returned residents should run their cold water tap for a few minutes to insure that any rust that may have entered the water service to your home has cleared. Please be sure to do this each night prior to drinking the water or doing any laundry.

In the event that a rusty water condition does not clear, please contact the Mineola Water Department at 746-0751 and personnel will be dispatched to flush hydrants in the area to clear the rust.

For all other information regarding the water main relocation and the ongoing electrical repairs, please contact PSEG Long Island at (800) 490-0025.

Your patience, understanding and anticipated cooperation is greatly appreciated.

Thank you,

PSEG Long Island
